Dashboard Description

Training & Placement Cell Dashboard is designed to monitor placement performance of students in a college. It displays important metrics such as the total number of students, eligible students, placed students, placement percentage, companies visiting the campus, and salary packages. Interactive charts help compare department-wise placements, company recruitment, placement trends, and average salary packages. Slicers allow users to filter the report by academic year, department, gender, and company, making the dashboard easy to analyze and use.
